**Live music performance with video: "Flight"**

**Abstract: "Flight"** (for computer, guitars and video)

*"Flight" (2011 version) is the Pindaric flight of an hypothetical insect or a very small bird that approaches disproportionately close to very small objects casually occurring everyday in front of our eyes. Normally we do not notice them and do not give importance.*

**Topic: Music**

*This flyby induces the entrance to a parallel world where a heavy distortion of reality reigns (either in the images and sounds), an unconscious self-produced "lysergic trip". The total lack of logical thinking is intended to lead beholder to a nonlinear perceptual catharsis.*
