**Topic: Stereoscopic Painting - Informational Art.**

**Author:**

*painting and music*

**Marco Cardini**

The painting in real time with stereoscopic 3D digital brushes, allows you to create multi-dimensional space of visual perception. Realigning the pixels of brushes with cyan and red optical filters, it is possible to compose multiple levels of perception visible in space. The PAGE MMM system consists of a program which allows the realization of visual/sound digital works of art executed in realtime under the control of the gesture of the performer.
